GEBHARDT Logistic Solutions

From logistic products to
process solutions

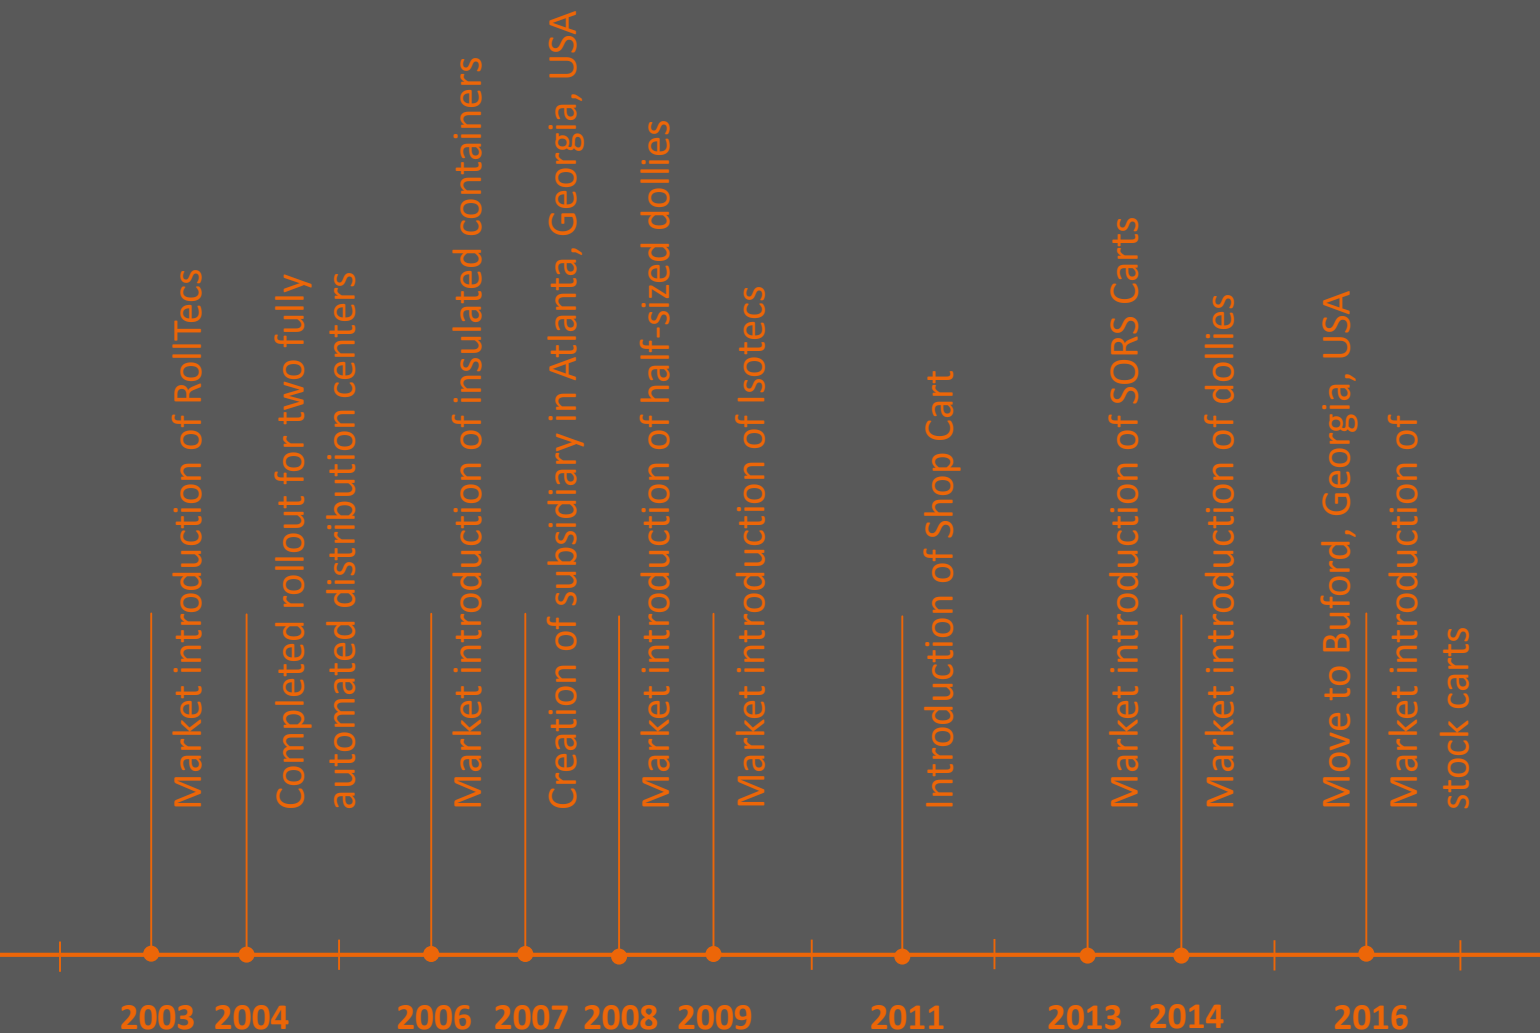

10 years of GEBHARDT in the USA

Ten years ago – In June of 2007 – the GEBHARDT family entered the North American material handling market. Over the past decade, we have extended our market knowledge and aggressively expanded our product portfolio. Today, as a subsidiary of the GEBHARDT Group, GEBHARDT Logistic Solutions is a premier supplier of load carriers and material handling solutions in North America, and covers the entire value stream from engineering to development and production.

By looking at the process from beginning to end, GEBHARDT is able to provide solutions that increase productivity. And by leveraging years of experience, GEBHARDT engineers are able to create designs that set industry standards and drive value to the bottom line.

Entering the US market

10 years of development

It all started with a small group of skilled designers and technicians, who created solutions to challenges faced by our partners in Southern Germany. In the 1960s with the release of their first Roll Container, GEBHARDT moved into the retail food industry and never looked back.

In 1987, GEBHARDT entered the American market with plastic Roll Containers, quickly becoming the market leader and setting the bar for all future development.

After years of steady growth, and with a demand for an increased presence in North America, GEBHARDT Logistic Solutions was founded in Atlanta, Georgia, in 2007.

With increased sales and a growing product portfolio, GEBHARDT was ready for the next step, and in 2016 moved into a new 30,000 square feet facility in the Atlanta suburb of Buford, GA.

10 years of success

GEBHARDT prides itself on designing products that offer unparalleled load protection during transport and storage. By fully understanding each client's individual needs, GEBHARDT can leverage our years of experience to create solutions as unique as the items they carry.

Over the last ten years GEBHARDT has also made its mark with standardized equipment that offers high value with known results. Our dollies, roll carts, insulated containers, and SORS carts have become market leaders due to their standardized design and use.

U-Boats, carrying pallets, bakery racks and other goods further round out our complete portfolio of material handling products.

Vision

10 years into the future

Our vision for the next ten years is to continue our push to be the premier supplier of material handling items in the North American market and beyond. With this goal GEBHARDT continues to invest in people, technology and equipment, all while expanding our expertise in the latest trends and needs of modern supply chains.

The GEBHARDT portfolio includes a growing range of services: Cart Leasing, Rack Buy-Back & Recycling, service training and an in-house test & technology center. At the same time we are proud of our pioneering role in the research on the load carrier of tomorrow: With well-known industry and research partners we have launched the iSLT.NET project – a network for intelligent, modular specialty load carriers. More information can be found at www.project-islt.net. Let's optimize your logistic process together!

Atlanta, GA

GEBHARDT Logistic Solutions

After ten years of success in the North American market GEBHARDT can look back with pride while continuing our march forward. Into the future, GEBHARDT continue to pursue dynamic, flexible and market-oriented growth in the US.
